Welcome to Ferrall Pools & Spas

Annual SPRINGSALE 2017

Please take advantage of the lowest prices of the year on chemicals, equipment, and supplies. We work very closely with our suppliers to get these prices as low as possible for you, our loyal customer. Our team looks forward to helping you complete your order over the phone, or in person at either Ferrall Pools location.

Many Thanks,

Mike Fisher
& The Ferrall Pools Team

BLUE SILK TABS & STICKS

Blue Silk Tabs and Silk Sticks feature SilkGuard technology from BioGuard. Unlike standard compressed trichloro, Silk Tabs and Silk Sticks do so much more than sanitize. With special additives that attach to hard water components and metal surfaces, SilkGuard protects equipment from corrosion and scale while killing bacteria and preventing stains. You'll notice how it leaves your water silky smooth, crystal clear and your skin soft.

SYSTEM OVERVIEW

SOFT. CLEAR. CHLORINE FREE

That's SoftSwim®. Just ask anyone who uses BioGuard's® complete, non-chlorine SoftSwim sanitizing system consisting of just three products. They'll tell you their pool water never felt so luxuriously soft or looked so sparkling clear. Better still, this system makes routine maintenance simple. But what is it about SoftSwim that makes it so different from other programs?

Special Prices Effective Through April 16th

ferrallpools.com/promotions

SoftSwim's superior performance is the result of three main components.

- SoftSwim A contains a patented algae prevention that is unique to SoftSwim
- SoftSwim B provides the bioguanide-based sanitizer that makes this program chlorine-free. Gentle yet effective, bioguanide is the reason SoftSwim is so easy on skin, hair and eyes.
- And SoftSwim C has the highly effective, dual formulation of a powerful clarifier and a hard-working oxidizer – a patented combination that keeps chemicals in your pool longer for sparkling clear water.

SoftSwim A

Use SoftSwim Algicide to prevent algae growth. Softswim A is a very effective algicide that works on a variety of algae types in the water. It also penetrates the tiny cracks and pores of the pool surface, where algae can start. Use 1qt. per 25,000 gallons initially and 2oz. per 10,000 gallons every other week.

1 Quart 25.99.....**22.99** _____

SoftSwim B

Use SoftSwim B to sanitize the water and control bacteria. Add one half gallon per 10,000 initially, then add as needed to maintain 30-50 ppm. 1 pint of SoftSwim B per 10,000 gallons will raise the B level approximately 10 ppm.

1/2 Gallon 33.99.....**29.99** _____

SoftSwim C

Use SoftSwim C to remove undesirable compounds and keep the water sparkling. Add 1 gallon per 10,000 gallons. Typically C is applied once a month, but may be needed more frequently during very hot temperatures, or if pool is being used alot. Maintain at least 40 - 60 ppm of SoftSwim C.

1/2 Gallon 18.99.....**14.99** _____

Oxysheen® SoftSwim C Demand

Catalase produced by water mold can impact a pool's ability to maintain SoftSwim C levels. Use Oxysheen to destroy catalase and enzymes responsible for the degradation of hydrogen peroxide. Oxysheen is a perfect fit in the SoftSwim family since it is a non-chlorine product.

7# Bucket.....42.99**38.99** _____

Optimizer Plus®

Use Optimizer Plus to enhance your water quality. It softens water and creates sparkling blue pool water. It also provides improved buffering in water, making it easier to maintain proper water balance. Finally, Optimizer Plus reduces the likelihood of cloudiness, algae growth and other problems. Optimizer Plus is a valuable addition to any SoftSwim pool!
